

Snow Removal Tips

If possible, delay non-essential travel until after the streets have been cleared.

Per resolution #89-25, no parking is permitted on Township streets when the snow depth exceeds two inches.

When clearing your driveway, do not discharge snow into the street or onto neighboring properties.

Please give the snowplow trucks room to operate. Intersections require numerous passes to clear and when backing up, our visibility is restricted. There are blind spot areas that concern every driver. Please remember that if you cannot see the snowplow truck mirrors, we cannot see you.
